

CAREER PLAN

I “*****” looking for the 190visa program sponsorship. After completing my master’s degree in professional accounting, I researched a lot about the career opportunities for an accountant in Tasmania, and from my deep research and analysis, I came across that Tasmania has a diverse economy where manufacturing, agriculture, and tourism are considered as a three major industries driven factor to enhance economic growth. However, it has the lowest seasonally adjusted rate of unemployment as compared to South Australia and Queensland, with business investment and the export of goods and services all growing faster than the Australian average. Hence, all these results and factors alone make Tasmania a marvelous place for accounting graduate opportunities.

I also came across that there are many different places in Tasmania, i.e. Hobart, Devonport, and Launceston which have tremendous accounting employment opportunities. Furthermore, Tasmania has some large accountancy firms with offices in the capital of Hobart and offers excellent graduate schemes, such as Bentleys Tasmania, Camerons, BDO Australia, PKF Financial Services, etc. Also, from research, I found out that from the past five years, the employment rate in the accountants’ field has been increasing drastically with further openings are also expected. Therefore, based on my research, I decided to pursue my career as a professional Accountant in Tasmania as my long-term goal. In this regard, I also searched for current opportunities available in Tasmania for the accountant field which are given below:

1. Senior Accountant

BDO (www.bdo.com.au/careers)

Hobart

2. Accountant

Calvary Health Care

Hobart, Tasmania, Australia

3. Accountant

Batchelor Civil Contracting Hobart

Accounting • Financial Accounting & Reporting

But to polish my analytical and technical skills, as well as, to gain professional experience in my respective field, I set my 2 to 3 years goal to become a Finance Manager or management accountant, or Senior accountant. I also have decided to enroll myself in the CPA program which will surely help me to excel and rise in the professional and innovative environment. Moreover, I also did a Chartered Accountant course before but due to family planning and issues, I freeze my course for some time but for now, I will resume the classes again to gain advanced knowledge and to learn new accounting skills.
